The IEEE ASRU Workshop is a biennial flagship event of the IEEE Speech and Language Processing Technical Committee. The workshop will be held on December 13-17, 2021. Since the global situation is still uncertain and given the slow vaccination progress worldwide, it is likely that the workshop will be virtual. We are making several efforts to make it in-person, but we depend on external unpredictable factors. In any case appropriate and timely information will be published in the website and widely distributed using all possible ways. Even if the workshop is virtual, we hope that sometime soon we will be able to welcome you all in Cartagena.

All papers related to automatic speech recognition and understanding are welcome. Topics of interest include, but are not limited to:

- Automatic speech recognition
- ASR in adverse environments
- New applications of ASR
- Speech-to-speech translation
- Spoken document retrieval
- Speaker/Language recognition
- Speech emotion recognition
- Methods and models leveraging multi-lingual resources
- Spoken language understanding
- Spoken dialog systems
- Text-to-speech systems

Authors are invited to prepare papers of 4-6 pages of content and figures, plus up to 2 pages containing only references, to the ASRU 2021 website: [www.asru2021.org](http://www.asru2021.org)
